Cottage Lake District.

A birthday surprise party was held Friday, Evg. April 6, at the home of Mr and Mrs Geo. Goebel. There was the biggest crowd that this district has seen for a very long time. There was plenty to eat and drink. Everybody had such a nice time, and most of the party stayed there till 6 o'clock in the morning and enjoyed themselves in dancing and listening to the jokes which were let loose. Mr Brusta did his very best on the accorded, and when you hear him you gotta get your partner and swing 'em 'round. It was too bad that the haymaker came up too quick and the crowd had to go home. They all wished to enjoy another party like it in the near future. Among those present were:

Mr and Mrs Joe Dietrich.

Mr and Mrs Jack Mayer.

Mr and Mrs J. Henrig.

Mr and Mrs Jao Altheim.

Mr and Mrs T. Ziemann.

Mr and Mrs H. Kulak Sr.

Mr and Mrs P. Barou.

Mr and Mrs A. Kotzschersky.

Mr and Mrs P. Altheim.

Mr and Mrs Brusta.

Mrs Margaret Barou.

Mrs Jack Obadal.

Misses Clara and Ella Kulak.

Messrs R. Mohr, R. Goerts and

Otto Drulitzer.

Make 'Em Join the A.T.A.

All teachers in Alberta would be compelled to join the Alberta Teachers' Alliance if a resolution adopted at the A.T.A. convention held in Calgary last week meets with the approval of the Provincial Legislature. The resolution urged the Government to secure legislation making membership in A.T.A. compulsory.

Holborn Happenings.

The Jr. Local held its vocational meeting on March 31, with a very good attendance. Quite a bit of business was transacted. Cecil Woodley was elected as our representative to the Junior Conference. A very interesting talk on Switzerland was given by Mr Mitchell.

Everybody is getting ready to get on the land.

The dance in the hall on Friday last, under the auspices of the U. F. W. A. was a decided success. Barth's orchestra supplied the music. The beautiful block quilt was won by Miss E. Racoff; the goose was won by a young stranger; Ole Ringaby won the box of candy; Mr Levi Stevens won the box of cheese; the prizes being donated by the ladies of the district; proceeds go toward lining the hall. To top the evening off a 5 lb box of chocolate was awarded to O Anderson and Miss E. Williams, as the best waltzing couple, the prize being donated by Mrs Huston.

Mr and Mrs Wm Englehardt, former residents, have returned. They will take care of C. Proppe's farm, while the latter is running the hills local on the 6th.

Miss M. MacDonald, our Junior director, paid a visit to Horne Hills Local on the 6th.

Mr. Wm Sylvester spent Easter holidays at his home in Edmonton. It is proposed now to change the Jr. Wheat Club to a Barley club, and used OAC21 as seed.

Holborn U. F. A. local is staging a play extraordinary at the hall on Friday evening next, the 13th. A dance will follow the play with Ursula supplying the music. Admission, adults 25c. each; school children 15c. Please bring lunch.

Two German Pictures.

Those interested in viewing pictures of their Homeland will be given an opportunity at the Moose Hall on April the 21st, as Mr. Stuermer, of Edmonton, has arranged to give a showing of films, which will include pictures of the Alps; Hamburg, the great seaport; the home of the Zepelins; and numerous others. There will be Folk songs played in connection with the pictures. His show should meet with good reception, and the price of admission is very low.

The Traveling Druggist.

Those living in the district who have been patronising, these many years, the perambulating motor dispensary of the Watkins products are liable to see a new hand at the wheel when it starts making its circuit this season. Mr. Gillespie is thinking of resigning in favor of a younger man, as he fears there is the possibility of his age "beginning to tell on him." His friends think his fears are unfounded, and point to the fact that he will reach only his 80th birthday this summer. Mr. Gillespie is a native of Waterloo County, Ontario, and has been in the west for a number of years.

There is the possibility of a young, enterprising resident of the Rosenthal district taking over Mr. Gillespie's route and business.

Mocha, Java & Nabob.

The demonstrations in town here on the 6th and 7th, celebrating the Home Economics week, proved to be a decided success. The affair was sponsored by the local W. I., with Mrs R. A. Walton convenor of the committee in charge, and all members co-operating. The show started each morning at Stony Plain Hardware, where for the time scheduled a Kelvinator was in operation under the supervision of Mr. Michael and staff.

The next place visited was Young's Grocery — the first tea filling station on the list — where refreshments were served by Misses C. W. Young and Wm Kelly.

Samples of food were handed out at Comisarrows, where Mine Host Larson of Royal Cafe fame, manufactured pancakes from Aunt Jemimma's Pancake flour.

The Red & White Store was the next place visited. An exhibition of cake making was given and samples distributed to visitors.

The grand finale took place in the reception room at the Hardwick Departmental Store where friends met and discussed social problems and politics over a dish of tea — Orange Pekoe or the Nabob brand.

Another series of similar demonstrations will be a welcome event to patrons of local shops.

The Western Economic Outlook

Writing in "Agricultural and Industrial Progress in Canada," Mr. John F. Sweeting, Industrial Commissioner, Western Lines, Canadian Pacific Railway, declares that confidence in the outlook for 1934 business is the dominant feature of the Western situation. Signs are not lacking in many parts of Canada that we are slowly emerging from the depression of the past four years. Improvement appears to be more noticeable in the Eastern parts of Canada, where some acceleration is apparent in the manufacturing industries. In the West where we depend almost entirely on agriculture, recovery will necessarily be more slow in coming. As a matter of fact we cannot hope for any great degree of prosperity whilst agriculture languishes. A good crop, fair prices for our wheat, and a market for our products are the needful factors. Mr. Sweeting says that improvement in trade, together with the realization that an upturn is now noticeable, has brought back the more satisfactory feeling that it is possible to consider that a period of trade and industrial expansion is to, a moderate degree, justified. Anticipated during the last few months, it is not difficult to venture the statement that every effort is being put forth to increase the volume of business throughout the West by methods that are most likely to react favourably.

It is, of course, too early to state what programme of new development is likely, though enquiries towards the end of last year appeared to indicate that some industrial expansion of note might take place during the present year, and that there may be more money available for building operations of all classes. In this relation, there should certainly be a distinct improvement over 1933 if necessary requirements are to be met in the erection of houses and commercial buildings, quite apart from any factory expansion. Any programme of moderate size would soon improve the home market, which has been nearly at a standstill for some time, though the export business has been showing important increases.

The mining industry is looking for a steady improvement, add activities in relation to development would be a confident outlook in this respect. In British Columbia, Manitoba and western Ontario work continues on an encouraging sign, and will bring some important properties into production during the present year.

The Western agricultural situation is a matter of constant study of ways and means to bring it to a more stabilized level, but, in the meanwhile, the Western agriculturist is bent on carrying on with ever-improving methods in the production of grain and livestock, having in view that ultimately his returns will justify confidence in Western Canada and its products. This is considered to be a reasonable attitude that will eventually realize greater value for farm products, more especially as the major effort is towards a higher standard that will meet export market requirements. This work is already showing results that further the belief that the correct course is being followed.

Alberta and to some extent in Saskatchewan and Manitoba, drilling for oil and gas is to be continued. The Alberta programme is to be of considerable size, according to present indications, the more southern field getting the larger share of the proposed operations.

The sodium sulphate industry of Saskatchewan increased its production during 1933, and it is anticipated other deposits will be brought into operation during the present year. The clay areas of southern Saskatchewan continue to cause interest, awaiting further development at such time that capital and growing markets are available.

The fishing industry of the inland lakes of the three Prairie Provinces is being fully investigated in order that the marketing of the products of these lakes may possibly be put on a better footing, and efforts are being made to expand the marketable areas for whitefish, as well as for other classes of fish that are available in large quantities from the fresh water lakes of the West.

Fishermen Perish In Storm

Eight Hundred Lives Lost When Storm Lashes Chinese Coast

Eight hundred fishermen were drowned in China, when a storm off the coast of Kwangtung province sank 300 fishing junks.

A Chinese customs cruiser rushed to the scene and picked up a number of survivors, the reports said.

Kwangtung province, lashed by a storm which was reported to have destroyed a fishing fleet, is the southern-most sea coast province of China. In it are located the cities of Canton and Hong Kong, and toward the northern border is the seaport of Swaton.

Cleveland is probing a poorhouse whose books show 24,000 gallons of gas used in 11 months in six small cars. Someone must have cleaned a tie—Detroit News.

Toys Made By Prisoners

Many Danish Convicts Continue Trade After Their Release

Convicts in Denmark, land of Hans Christian Andersen, of fairy tale fame, have been put to making toys. They are allowed to use their imagination instead of helping in mass production. The toys are sold outside, and the men paid regular wages, part of which goes to the state for their keep, some to the "Prisoners Aid Society, a portion to dependents and a small amount to the prisoners, to be spent at the prison canteen. Many men are following the trade after their release.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far, if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

European Travel Costs Lower

Reduced Railway Fares As Well As Hotel Rates

Contrary to a wide-spread impression, European travel costs this year, despite foreign exchange rates, are actually lower than they were in the peak travel year of 1926, according to the Cunard & Anchor-Donaldson Lines.

This fact is revealed in the inclusive tour costs of the big travel agents and the reduced fares on railways, automobiles and hotels. Private automobiles can be hired at a much lower price, the costs being reduced by 44%, the cars being reduced by 46%, with comparative reductions in other countries.

Hotel rates average 36% less all over Europe than they were in 1926. In Paris the reduction is 33 1/2%, in London 21%, in Nice 26%, in Genoa 66%, in Rome 50%, in Naples 40%, in Heidelberg 25%, in Cologne 35%, in Amsterdam 41%, and in Brussels 23%.

Railway fares have been lowered in many countries. In Holland, for instance, the reduction has been as much as 22%, in France 30%, in Poland 25%, in Switzerland 30%.

Taxis have come down considerably; in Amsterdam, for instance, a taxi ride, regardless of the distance covered, costs you only 27c, half as much as in 1926.

Organized sight-seeing tours in Europe are considerably reduced. In Paris, they are 25% in Nice 28%, in London 14%, in Brussels 22%, in Rome 25%, and in Heidelberg 37% less than in 1926.

These reductions more than offset any unfavourable effect of high exchange operating in some countries.

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose 32 lbs. of fat?" is the question you will be asking. Let her tell you herself:—

"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially when I had to go to the beach comfortably, and walking was unbearable. I was advised by a friend to try Kruschen Suits, and am very glad I did. I don't feel as fat as I used to be. I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs., and I feel much better in health. I have all my weight tickets—substantiate my statement,"—Doris M. T.

Kruschen contains those six mineral salts, proportionately balanced, found in the waters of those famous spas used by generations of fat people to reduce weight.

Kruschen helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel years younger—look better, work better.

To Assist Livestock Industry

Want Reports On Detrimental Practices Of Livestock Buyers

To assist him in the presentation of the important information respecting the livestock industry to be submitted by joint representation of the government of the prairie provinces, Hon. W. G. Buckle, minister of agriculture for Saskatchewan, is desirous of having farmers interested in the production and marketing of livestock, report any specific example of where the producer is not the recipient of full market value for his livestock due to detrimental trade practices or other defect in the present system of marketing livestock. All statements should be accompanied by documentary proof. Opinions are valuable when based upon facts, but without them, are useless in a case of this kind.

It is expected that joint representations from the prairie provinces will be submitted to the Parliamentary Committee, Ottawa, very shortly. The Livestock Associations and the Livestock Pool, have been invited to present available data to Hon. Mr. Buckle to be incorporated in a joint statement on behalf of the three prairie provinces.

Evidence that the seabed of the Indian ocean once was a continental area, including deserts, has been found by an oceanographical expedition.

Wales Takes Canadian Steel

First Order Will Likely Be Followed By Others

Canada for the first time in her industrial history, the Guardian says, is supplying South Wales with her steel in competition with the imports received from Belgium, Germany, France and Sweden.

The steamer Grey County recently arrived at Newport with 3,600 tons of Canadian steel billets and further cargoes of this product are expected.

"Although there is a heavy duty on foreign steel," the paper says, "South Wales still imports about 18,000 tons a week, which is used for conversion into tipplates. Canada recently gave an order for 1,000,000 boxes of Welsh tipplates and an endeavor is being made to create a reciprocal trade between South Wales and the Dominions."

Farmers of the Netherlands are welcoming the payments by the government from its agricultural crisis fund.

Of 18 swimmers, including nine men, who attempted to swim the English channel in the summer, only one, a woman, was successful.

Report Finding Of King Solomon's Mine

Rhodesian Prospector Refuses To Give Exact Location

Finding of King Solomon's mine, search for which has caused the death of thousands has been reported by a prospector in Broken Hill, Northern Rhodesia. He declares that he discovered it while following a wounded buck, but refuses to give the exact location except that it is in the centre of a mine concession. For more than 300 years men have been searching for the legendary mine. In Solomon's day it was said to be so fabulously rich in gold that silver became of little value in his court. The search has gradually narrowed down to an area of about 250,000 square miles. Arabs tortured many natives in an effort to extract information about it and many Portuguese tramped hundreds of miles in search of it.

For the first 11 weeks of this year and last year (figures for the latter within brackets), the numbers of livestock shipped from Western to Eastern Canada were: Hogs, 57,995 (78,234); cattle, 18,554 (5,621); calves 148 (19); and sheep, 25,932 (21,480).

Quick Relief Now From Neuralgia

JACK, I'M TO SEE CLARK ABOUT THAT BIG ORDER IN 10 MINUTES AND I HAVE TERRIFIC NEURITIS... WHAT CAN I DO ?

DON'T WORRY: GET SOME ASPIRIN, TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

2 LATER

WE'RE JACK. I GOT THE ORDER! YES, IT'S FINE, IT'S A TIDLE.... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuralgia . . . the fast, safe relief, it is said, yet discovered.

The tablets are dissolved to a solution, dissolve by touch. An Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. A single tablet will stop pain in a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to dissolve as soon as you swallow it. And thus is ready to go to work almost instantly.

When you buy, though, be sure you get ASPIRIN's quick relief, be sure the name BAYER is in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST Drop an Aspirin Tablet into a glass of water. Note that BEFORE it touches bottom it has started to disintegrate.

What it does in glass it does in your stomach. Hence its fast action.

MADE IN CANADA

Does Not Harm the Heart

ASPIRIN

A Complete Telephone Service Circling The Globe To Be Realized In The Near Future

Around the world telephone conversation, linking men's voices in every important capital and commercial city, is imminent, according to engineers who are observing the 50th anniversary of the first voice transmission on electric waves.

Already the earth is completely enclosed by chains of telephone connections. From the United States men talk across the Pacific with Manila and across the Atlantic through Amsterdam, Berlin or Brussels to Managua or other eastern oceanic points. But working connections through Tokio and Shanghai to the United States and Oceania are still needed to provide the links between the last great centers of population.

The principal missing link—between the United States and Tokio—is rapidly being forged and probably will fit into the chain before the end of the year, according to engineers. Some authorities expect it within two or three months.

Tests have been conducted between the United States and Japan for about a year, indicating the prospect of regular service in the near future." Stanley Shoup, communication expert in the U.S. department of commerce, stated.

During the last 12 months the United States opened telephone communications either for regular or special occasions with Russia, Venezuela, Mexico, Guatemala, Panama, Costa Rica and Nicaragua. Earlier it opened communications with virtually every nation in Europe and South America and even with South Africa.

In all, 52 nations are in telephone contact with each other, and every nation having more than 100,000 telephones, except Japan and China, is in part of some world-wide chain.

In addition to perfecting the connection between the United States and Japan, Japanese and Dutch engineers are perfecting the link between Tokio and Bandeung in Java, which is the terminus of two chains to Europe and a junction between Europe, Australia and New Zealand. Manila and Bandeung are connected already.

All this development has come since March 10, 1876, when Alexander Graham Bell conversed in Boston with a companion seated in another room a few feet away. Most of the American international telephone development had occurred since 1922, when only Cuba and Canada were linked with the United States.

It is estimated that 22,000,000 telephones are in operation throughout the world today, of which about 17,000,000 are in America. The telephone wires in the United States alone would reach 2,400 miles around the world if stretched in a single length.

Salt "Grown" On Stalks

Egypt Has New Way To Obtain Product From Sea

At Alexandria, in Egypt, they have just started a new way of obtaining salt from the sea. It is being "grown" on stalks. The water is admitted from the sea into a large level tract near the coast in which stalks have been placed upright at intervals. The salt in the sea is then cleaned and the water is left to evaporate under the influence of the powerful Mediterranean sun. Crystals of salt form round the stalks, and when at last the water has all gone a more or less mushroom-shaped pillar of salt stands where each stalk was planted. This form the salt is more easily handled than when it was allowed to evaporate in large masses.

Using Explosive Gas

A group of chemists at Johns Hopkins University in Baltimore, Md., are using gasoline costing \$300 a gallon in an experiment to eliminate carbon monoxide gas from the exhaust fumes of motor vehicles. The petrol is fed by the teaspoonful to a one-cylinder motor.

Measuring City Noises

German Has Discovered Interesting Facts About Deafness Apparatus
Measuring the noise of traffic, by which big city dwellers are subjected with the latest and most delicate sound registering apparatus, a German finds that at the sound of tearing paper the figures indicated pointed to 44. The figures for horse-drawn vehicles, trolley cars and subway were 59, 68 and 80 respectively. The honking of an electric motor horn to 92, while only 80 was registered when an ordinary motor horn sounded. The roar of a hungry lion was a close second to the noises discharged by a wide open motor cycle. The figures were 101 and 102. Indoor experiments revealed that a room with 200 adding machines in operation is as noisy as a metropolitan thoroughfare at noon.

PLAID NECKTIE SILK JACKET DRESS RULES THE MODE FOR 1934

For town, spectator sports, cocktail.

To-day's pattern will delight you with its newness, faultlessness and smart lines.

The dress of shirtwaist styling is sort of tailored, and the buttons down the front of the bodice are in a slim look. The pointed skirt section with centre-front seaming also helps marvelously toward making you look tall. The collarless jacket is very smart with its three-quarter sleeve length.

Easy to make! You'll be amazed at the short time it will take you to make a pattern. The plaid silk, cotton novelties, lightweight wools, etc., are other suitable mediums. Style No. 610 is designed for sizes 14, 16, 18, 20, 22. The pattern requires 4 yards of 30-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

An Interesting Discovery

Under Favorable Conditions Organisms Considered Dead Will Live On

Life often survives after "death." University of California scientists' experiments revealed and the question arises:

"Dead—but how dead?"
Organisms considered dead live on under favorable conditions, Dr. F. M. Uber, research associate in botany, found. A living death, he revealed, is shown by X-radiated mold cells which have three different kinds of "post-mortem" growth.

Self-destruction by gas or potassium cyanide is always doubtful because methylene blue can often restore the victim. Disease bacteria, pronounced dead after application of a disinfectant, may be found in intact pulsing pigs with the disease.

Prolonged growth of "dead" organisms in the university laboratory have led Uber and others to believe that "death" is an ambiguous term. Under conditions favorable to life, he found that death is an indefinite state.

"Dead" cells are not brought back to life," Dr. Uber explained. "They are only dead to a certain degree and will still grow."

Uber and Dr. D. R. Goddard have conducted experiments with X-radiation on bakery mold cells.

People, plants, reptiles and bacteria, considered dead, when properly treated, have continued to grow. Plants with the roots removed can be made to grow by the application of certain chemicals.

More than a popular superstition, Dr. Uber said, is the fact a "dead" snake will wiggle for several hours. Even beheaded and skinned, the reptile's circulatory system will continue to pulsate for several hours, showing that cells are continuing to divide—that the snake is still growing.

By X-radiating the spores of common bakery mold, Uber and Goddard destroyed certain functions. In one instance they destroyed the sexual reproductive function. After being apparently incapable of growth, the spores reproduced themselves vegetatively.

The scientists destroyed one of the two nuclei contained in each spore, both of which had been believed to be necessary to growth, but the organism grew despite this. When a complementary nucleus was destroyed the spore grew, but produced a mold of a different color and shape.

Hot Coffee For Policemen

Brussels, Belgium, is determined that no one in the city shall be cold this winter. Even policemen on beats are served hot coffee and those who must stand on corners are relieved every half hour. The Red Cross and other societies have joined to provide heated shelters for the unemployed. Hot coffee and soup are distributed, and braziers have been placed at many corners.

A boy watches his father better than he listens to him.

ROOSEVELT AUTHORIZES 102 NEW WAR VESSELS

Here we see President Roosevelt signing the Vinson Naval Bill, authorizing construction of 102 new war vessels. At the left is the author of the bill, Carl Vinson of Georgia; and at the right is Henry Roosevelt, Assistant Secretary of the United States Navy.

New Method Is Discovered By Chemists For Extracting Precious Minerals From Sea Water

Life Insurance

New Business Written In February Shows Improvement Over Last Year

Sales of new ordinary life insurance in Canada and Newfoundland, by 19 companies having 91 per cent. of the business in force, totalled \$29,493,000 in February—a distinct improvement over sales for January and an increase of 2½ per cent. as compared with February 1933. On March 1, with a value of \$12,890,000, sales were up over 4 per cent., as compared with the same period last year. British Columbia was up nearly 8½ per cent., and Alberta 7 per cent., while in the Maritimes, New Brunswick showed a remarkable increase of nearly 35 per cent., and Nova Scotia 15 per cent.

Following are the sales in detail as reported by the Life Insurance Sales Research Bureau:

Alberta \$1,173,000, British Columbia \$1,934,000, Manitoba \$1,500,000, New Brunswick \$893,000, Nova Scotia \$1,105,000, Ontario \$12,890,000, Prince Edward Island \$71,000, Quebec \$8,972,000, Saskatchewan \$930,000, Newfoundland \$225,000.

Grain Fed To Poultry

Canada's Poultry Consumed Over 85,000,000 Bushels Of Mixed Grains In 1931

It is estimated that Canada's poultry consumed over 85,000,000 bushels of mixed grains in 1931. The various grains, says the Dominion Poultry Husbandman, that comprise this mixture, with an estimate of the number of bushel (in millions) of each are: Wheat, 34; barley, 21; oats, 17; other grains, 13; that is, 40, 25, 17 and 15 per cent. respectively. This means that at the 1932 average yield per acre in all Canada of 35 bushels of wheat, 21½ bushels of barley and 29½ bushels of grain, there will over 4,000,000 acres to grow the grain that is marketed through the poultry route. Of this average over 2,000,000 acres were required to produce the wheat alone.

Speed Too Greatly Stressed

Hon. R. J. Monson, minister of railways, says: "My impression is that had there been less speed on the railways, in automobiles and in other ways the world might be as happy as it was a few years ago, or certainly not less than it is to-day. I believe the matter of getting between two stations in fifteen or twenty minutes less time is not of great importance."

The number of hogs graded in Canada for the first 12 weeks of this year was 776,435 compared with 743,427 in the corresponding period of last year.

Discovery of a chemical formula which "ionizes" the gold and silver dissolved in sea water and promises man his first "open sesame" to the fabulous mineral riches of the ocean was announced to the American Chemical Society.

There is enough liquid gold in the sea to pave North America and enough silver to roof the world, but until to-day scientists have had to dredge the mud and make could ever extract it at less than prohibitive cost. To-day paying commercial extraction within 10 years was forecast by two of the best-known chemists in the United States.

The sea gold in its new form is actually running at the rate of about 3½ pounds a day, or \$1,000 worth, through the waste of a unique chemical plant near Wilmington, N.C. About six pounds of silver a day goes with it—also valuable mercury, likewise "ionized."

The all-important change in the nature of the gold was an accidental or unexpected by-product of extracting bromine from sea water, which started only two months ago.

The bromine end of the gold story was given in a report by Dr. Willard H. Dorn, who helped establish the Wilmington plant. This plant takes 15,000 pounds of bromine daily from Atlantic tide water pumped into a plant on Cape Fear. Bromine is used for anti-knock gasoline, war gas, headache medicines, a number of human diseases and for photographic film.

The newly-tapped supply is apparently inexhaustible. Assays show there is about one inch of bromine per cubic mile. There is only about 1,100 of an inch of gold per cubic mile in the Atlantic waters.

Barley Acreage Reduced

Carry-Over For This Year Will Be Very Small

The carry-over of barley on July 31 next will be very small, a factor that the agriculture should consider, says "The Agricultural Situation" bulletin just published by the Dominion department of agriculture. Consumption of barley in Canada has averaged about 75 million bushels a year, having increased steadily from 1920 to 1930. A sharp reduction took place in 1931, and since that year the area has remained at slightly over 3½ million acres. Reduced acreage and low yields have caused a sharp decline in production in the past two years when inward carry-overs and new crops have averaged 37 million bushels, compared with 124 millions during the five crop years from 1926-27 to 1930-31. As a result, consumption has declined during the past two crop years and will probably be lower during 1933-34.

Possible To Change Plant Characteristics

London Professor Experimenting In Botanical Research Station

Bigger and better flowers and vegetables for your garden are possible as a result of experiments which are taking place in a little-known botanical research station in Regent's Park, London. Professor R. Ruggles Gates, of King's College, is achieving remarkable results by applying shock tactics to plants and seeds. "By applying an X-ray shock or violent changes of temperature," he stated, "it is possible to change the characteristic of a plant." New varieties of snapdragon flowers and cabbages have already been produced by this means on the Continent.

Ordered To Pay Anyway

When haled into Lambeth county court, England, a debtor produced a bundle of documents and explained that they were the birth certificates of his 18 children. "Until recently I was unemployed," he said, "and for months I did not know what a substantial Sunday dinner was. Ten of my children I now support." The judge ordered him to pay monthly instalments of 25 cents each, which will clean up the debt in 10 years.

CHILDREN'S COLDS

WORLD HAPPENINGS BRIEFLY TOLD

After spending 24 hours and 10 minutes swimming continuously, E. K. Ghose, the famous Bengalee swimmer, came out of the water to claim that he had beaten a world's record.

Central collegiate orchestra, of Regina, directed by R. J. Staples, were adjudged the winners in the high school orchestras competition in Winnipeg.

The London Times commenting editorially on the Canadian government's new natural products marketing bill, said the bill is likely to become the principal issue in Dominion politics.

Electric bulbs giving light corresponding with the colors of the solar spectrum have been used with remarkable results in developing plant life in a laboratory of the Academy of Science in Paris, France.

Britain is getting the ice cream habit. In 1933 the United Kingdom consumed 40,000,000 gallons, a new record, and the consumption was almost as great in winter months as in summer.

Sweden will not be able to reduce her defence armaments, whatever international agreements are made, said R. J. Sander, Sweden's minister of foreign affairs, in an address at Stockholm.

Dr. Joan F. Coar, professor of German in the University of Alberta, will retire from that position at the end of the present academic year, it has been announced. He has reached the pension age. Dr. Francis Owen, associate professor in the department, will take over teaching of German.

Even Toys Are Speedier

Toy automobiles for the 1934 season have been streamlined like most of their big prototypes, and also speeded up, according to advance information from the toy association. The new models are guaranteed to travel 100 feet in a minute. The electric ones will travel five miles without new batteries.

Professor—"What? Forgotten your pencil again, Jones. What would you think of a soldier without a gun?"

Jones (an ex-service man)—"I'd think he was an officer."

Aid For Saskatchewan Horse Breeders

Federal-Provincial Premium Policy Of Assistance To Horse Breeding

The Hon. W. C. Buckle, minister of agriculture for Saskatchewan, has made an announcement that is of great interest to the horse breeders of Saskatchewan. He states that the Federal-Provincial Premium Policy of Assistance to Horse Breeding will be put into effect in Saskatchewan this year on a modified scale.

This provides for the payment of a premium to choice, sound, outstanding stallions that are approved by the federal-provincial board for this season. The premium will be calculated on mares proving to be in foal to these stallions at the rate of \$4.00 for each, to a maximum of fifty, that is, not over \$200 will be paid for the service of any one stallion.

This policy is designed to benefit horse breeders, but the premium is payable to the stallion owner to allow him to reduce his service fees in order to enable farmers to make use of the service of a premium stallion at a moderate cost, and thus raise a superior type of draft horse.

The payment of premiums is shared equally between the Dominion Department of Agriculture, Ottawa, and the Saskatchewan Department of Agriculture, Regina.

The only stallions that are eligible for this premium are pure bred, registered stallions that are free from unsoundness, of outstanding type, conformation and quality, with true, straight action, possessing plenty of size, and three-year-olds in ordinary breeding condition, must weigh 1650 pounds or over. Four-year-olds must weigh 1750 pounds or over, and mature horses must weigh 1850 pounds or over.

No stallion will be considered for the premiums unless he is enrolled and licensed for 1934 under the Provincial Horse Breeders' Act.

Spring And Summer Cruises

Delightful Ocean Voyages Planned By The Cunard Line

In announcing a series of twenty spring and summer cruises to the Mediterranean from London and Liverpool the Cunard Line adds a new development: overnight stays in the more popular or festive ports. The idea of prolonging the call is to enable passengers to attend places of entertainment open only at night. Experience gained during the past two years proves that passengers after spending the day in shore excursions like to visit a theatre or attend some festivity taking place in the evening.

Thus itineraries have been arranged for the ship to stay late in such ports as Lisbon, Barcelona, Monte Carlo, Naples and Casablanca, all of which offer attractive opportunities to take part in spirited night life.

These shore cruises will be made by the Sardinian and Lascaris. The first left Liverpool on March 29, calling among other ports at Lisbon and Vigo. As an illustration of how the new scheme will work out the ship will remain at Lisbon for 24 hours, instead of the usual 8, and at Vigo for 15 hours, instead of the usual 10. Similar holdovers will be included at all festive ports.

Ship cruises will range from 6 to 17 days and the rate will begin at 9 guineas. The Lancastria will sail from Liverpool and the Samaria from London.

During July three additional cruises will be made to the Norwegian Fjords, while two others will visit the principal northern capitals.

Trans-Atlantic connections with any of these cruises may be booked through any of the Canadian offices of the Cunard Line.

Eating Up The Fee

The teacher heard a child crying and rushed out to the playground to find out the cause of the disturbance.

"What is the trouble?" she asked of little Jimmie, who stood calmly by, eating an orange.

"Billy took Fred's orange," explained the witness.

"And where is the orange?" asked the teacher.

"Oh, I have that," replied Jimmie. "You see, I am the lawyer."

Warren Hastings was the first governor-general of India.

Little Journeys In Science

OCEAN DEPTHS

(By Gordon H. Guest, M.A.)

Much has been written about the conquering of Mount Everest and other great mountain peaks but few people have interested themselves in the other extreme in nature, the deepest depths of the ocean. Mount Everest in the Himalayas is some 29,000 feet high, but in the Swire Deep, off the island of Mindanao in the Philippines, the sea is 32,088 feet in depth. The average depth of the ocean is considered to be about 12,000 feet, or nearly two and a fourth miles.

Little sunlight goes down farther than 1500 feet, and below that level it is utter darkness, and the water is so cold that were it fresh, and at the surface, it would freeze. The water here has been heated by many fish, who depend for their food solely on particles that come down from the surface of the sea to the sea floor, which is the measure of the water is two tons to the square inch. Because their tissues are so porous that they absorb sufficient water to balance the pressure of the water above them, and they are able to live at home with that tremendous force pounding on them from all sides.

Fish living in these ocean depths have one peril that confronts no other living creature, the danger of falling upwards. If these fish rise too far above the bottom of the sea, the gas in their swim-bladders expand, and they are forced towards the surface, the bladders burst and the fish "explode".

Even the most severe storms do not disturb the water to a depth of more than 300 feet, and so the depths are always stable and quiet. Strange fish cruise around in the depths and occasionally there comes to rest a dead whale or some other saturated object from the higher levels.

Let no one think that religion does not apply to private life; it applies to the way you do your most common work just as really as to what are sacred duties.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile
—Without Calomel!

Your liver's a very small organ, but it certainly does a great deal for you. It digests and eliminates wastes, and it also contains daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking a laxative or by chewing gum or roughage. When they're through—when you're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the health and energy you have lost. They're safe, safe, safe. Ask your druggist for them by name. Return substitutes. 25¢ at all druggists.

SUNDAY SCHOOL LESSON

APRIL 15

JESUS TEACHES FORGIVENESS

Golden Text: "Forgive us our debts, as we also have forgiven our debtors." Matthew 6:12.

Lesson: Matthew 18:15-35.

Devotional Reading: 1 Corinthians 13:1-8.

Explanation And Comments

How To Treat Offenders, verses 15-19. Jesus advised his disciples first to tell the offender of his fault, then to rebuke him in the presence of others, and finally to let him go if he still gave no heed to their words, to tell his offense to the church. "When two or three are gathered in my name, he added, "there am I in the midst of them."

Unlimited Forgiveness, verses 21-22. Peter's question, "Lord how oft shall my brother sin against me, and forgive him?" followed naturally on Peter's question, "Ought I to rebuke him?" Peters heart glowed with compassion, for he was not ready to go much farther in forgiveness than was the ordinary man. Did not the commandment, "When a man sins against another, that other forgives him once, he forgives him a second time, he forgives him a third time, but the fourth time he does not forgive?"

"No," answered Jesus, "I tell you not until seven times, but times without number until seventy times seven."

"Seven times seven?" asked the disciples of Peter. When the Jews had run through seven days, it begins again; the circle is complete. So no expression could more forcibly convey the impression of endlessness.

Calomel, "a medicine for aches and pains against another, that other forgives him once, he forgives him a second time, he forgives him a third time, but the fourth time he does not forgive?"

"No," answered Jesus, "I tell you not until seven times, but times without number until seventy times seven."

"Seventy times seven?" asked the Jews.

"I tell you, my friend, that your sins are blotted out."

For all the blessed souls in heaven are both forgivers and forgiven."

Tennyson.

Peter himself was an illustration of the grace of unmerited forgiveness. He sinned and sinned and sinned again. Dr. J. D. Jones relates Peter's after Christ's death saying to him, "O to great sorrow, I am a debtor, I'm constrained to it, and again and again taking himself as a text and preaching a sermon of comfort and hope to downcast and despairing souls."

During the month of February 2, 778,358 lbs. of branded beef were sold in Canada.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The haricot or French bean is a native of South America, and was seen by Columbus in Cuba.

Spinach was a comparatively late arrival in Europe from Persia via the Moorish invasion of Spain.

Sugar is being made out of wood in a large-scale factory finished this year at Mannheim, Germany. At present the sugar is fed to livestock.

It was not until after the civil war in the U.S. that the tomato reached the northern states, although well-known in the south.

It took 300 years to popularise the potato in Europe, and only dire necessity forced the country cottager to include it among his vegetables.

The number of producing maple trees on Eastern Canadian farms is estimated at over 70,000,000, of which 24,000,000 will probably be tapped.

Insect pests, notably the corn borer, influence the tonnage of sweet corn available for canning in Canada, but wherever this pest may reduce production in one area, the decrease may be replaced by increased plantings elsewhere.

MOVE TO BOOST AND STABILIZE WHEAT PRICES

Rome.—World wheat experts gathered here for conferences that may write agricultural and economic history by boosting and stabilizing wheat prices through an international agreement and point the way to other recovery efforts.

Minimum quotations for wheat exports were considered the chief topic for discussion during the meetings, but legislative measures to increase consumption of wheat and the control of all shipments were also important items on the agenda.

The permanent advisory commission of countries signing an international wheat export limitation pact last year was represented as desirous of reaching a world agreement to raise the minimum export wheat price at least 25 per cent., and experts said that a boost of 30 or even 35 per cent. would be more welcome.

The present world parity, based on the average price of all grades of imported wheat in all ports sold during the week at British ports, is a little more than 40 gold cents a bushel.

If the advisory commission agrees to recommend a minimum price to the governments, and the nations agree, the minimum quotation will be about 55 gold cents.

A canvass by the Associated Press of the delegates showed the following reaction to the plan:

Great Britain favors it as a means of aiding agricultural exporting countries, including Canada and Australia.

France was one of those formally proposing the measure.

Germany, another of the original proponents, will support it.

Argentine delegates were inclined to be skeptical regarding the practical possibilities of a minimum agreement in the belief that the control thereof will be difficult and evasions frequent.

The United States wants an international agreement on the reduction of wheat acreage as a preliminary to the minimum export price agreement, her argument being that a minimum price accord otherwise would discourage an acreage reduction.

Canada and Australia are the only countries whose internal wheat price equals the world export parity, and they favor a minimum quotation.

The French delegation suggested to the advisory commission that compensation in the way of increased exports of industrial and other products in return for a reduction of wheat acreage should be made importing countries.

This scheme, its advocates contend, would get the support of other importing countries, including Germany, Italy and Great Britain.

Canada, the world's greatest wheat exporter, is known to be ready to lead in fully implementing the August wheat pact. Under her recent Natural Products Marketing Act, wheat boards are to be set up in the wheat growing provinces, acting with a federal board, to license and restrict sales so that Canada's exports abroad will not exceed the maximum she accepted for the crop year 1934-35. This maximum is expected to be around 265,000,000 bushels, compared with the maximum of 200,000,000 for the expiring crop year.

The selection of John I. McFarland as the chief Canadian representative to Rome was interpreted as signifying Canada may again take the initiative she showed last August. McFarland is in charge of Dominion stabilization arrangements for the Winnipeg market.

Girl Guides For Switzerland

Toronto Girl Guide leaders of each of the Canadian provinces have been asked to recommend a first class Guide, aged 18, to the Canadian headquarters executive committee, for the selection of Canada's representative to the international encampment at the Guide chalet, Adelboden, Switzerland, next July.

Appeals Will Be Allowed

Clause In Manitoba's Wheat Control Bill Has Been Altered

Winnipeg.—Premier John Bracken's emergency wheat control bill passed safely through law amendment committee of the Manitoba legislature with one significant amendment. The bill now goes into committee of the whole.

The section of the wheat bill proposing orders of the wheat control board would be above any question, review or appeal in the courts was the only clause to be altered.

On the motion of Premier Bracken it was rewritten and remodeled after the clause in Saskatchewan bill, providing for court action on the wheat board's decision only when a flat has been obtained.

Dominion guarantee of a minimum price of wheat to the farmer while the world wheat agreement is in effect will be asked in a resolution to be moved in the legislature by Douglas Campbell, federal member for Lakeside. It requests a guarantee of a minimum of 63.02 gold cents per bushel, basis No. 1 Northern grade, C.I.F. Liverpool, equivalent to 105¢ at Liverpool or 90 cents at Fort William.

Manitoba Beer Bill

Sale Of Beer By Case In Licensed Hotels

Winnipeg.—After three hours' debate, the bill to amend the Government Liquor Control Act to permit beer sales for the sale of beer by the case in licensed hotels was given third reading in the Manitoba legislature.

Parties were split on the debate with Hon. W. J. Major, attorney-general, declaring widening of the beer selling facilities was necessary in the drive to eliminate bootleggers.

The vote on a motion by George Dimashko (Cons., Brandon) to delete the clause providing beer depots from other minor amendments was defeated 30-10. There was no record-vote on third reading.

Volcano Active In Iceland

Rain Of Ashes Over Eastern Part Of The Island

Reykjavik, Iceland.—Eruptions of the famous Skeldararjokull Cirkla volcano grew in intensity and buried a rain of ashes over the entire part of eastern Iceland.

The rumbling, which began some time ago, became louder and could be heard distinctly up to 155 miles away.

The centre of the explosions was located beneath the Medio Vatnajokull glacier, which is north of the Skeldar river. The nearest village is 31 miles south of the glacier's edge.

Provincial Marketing Board

Alberta Bill To Give Effect To Dominion Marketing Act

Edmonton.—Implementing federal legislation, a bill to provide for the functioning of a provincial marketing board was introduced in the Alberta legislature by Premier J. E. Brownlee. It was given first reading.

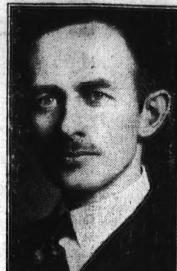

The bill aims to give the provincial government power to bring into effect by proclamation any part of the Dominion Marketing Act.

THREE POSTMASTER GENERALS MEET IN THE BRITISH CAPITAL

Left to right: Hon. Arthur Sauve, Postmaster General of Canada; Sir Kingsley Wood, Postmaster General of Great Britain, and Hon. Robert Archdale Parkhill, Postmaster General of Australia, are shown in London, discussing the International Postal Congress which they recently attended in Cairo.

TO RETIRE

Hon. Thomas Ashmore Kidd, who retires from the speakership of the Ontario legislature when the House dissolves. Irrespective of the outcome of the forthcoming Provincial General Election, Colonel Kidd will not be back in the Speaker's chair. Sitting through five sessions, never once sick, and never once absent for any reason, is the enviable record which Colonel Kidd has established.

Fortune Awaits Disposition

Will Covering Estate Of Fur Trader Lost Many Years Ago

Fort William.—A fortune reputed to amount to millions of dollars was unclaimed disposition while apparent direct heirs in widely separated parts of Canada looked for developments.

The fortune consisted of the estate of James Hudson, who died 200 years ago in trading with the Indians in James Bay district.

Claimants to the fortune include Moses Frost, 93, of Fort Arthur, and Mrs. John Peever, Vancouver. They were grandson and granddaughter respectively of the trader. The fortune is now understood to be in chancery in England.

Delay in settlement of the estate was caused because the will, written on buckskin, was lost or stolen from Mr. Frost's mother in 1867.

Kitsilano Boys' Band

Western Aggregation To Make Tour Of England And The Continent

Vancouver, B.C.—Arrangements have been completed for the Kitsilano Boys' band of Vancouver to spend several weeks in England on tour this summer, with the prospect that engagements on the continent will also be filled.

The band, numbering about 45 members, will leave Vancouver on June 25 and play in Banff, Alta., Calgary, Swift Current, Sask., Moose Jaw, Sask., Winnipeg and Montreal, sailing from the latter port on July 6.

Socialism And Monarchy

Montreal.—The English crown and Socialism are not incompatible, and England would be better off as a hereditary monarchy even if the country became Socialist, Sir Stafford Cripps, leader of the English Labor party, said here in an interview.

Will Go To Ottawa

Victoria.—Premier T. D. Pattullo announced that he would go to Ottawa late this month to confer with the federal cabinet on British Columbia matters.

Advance In Science

Dr. Tory Criticizes Present Methods Of Education

Toronto.—Defence of the rapid strides in advancement of science and criticism of the present-day educational methods were made by Dr. H. M. Tory, head of the research bureau of Canada, in an address before high school principals at the Ontario Educational Association annual convention here.

Answer to the topic of his address, "Why science is worthwhile," said Dr. Tory, was in its effect on the intellectual life of the modern world; social well-being and material progress.

One of the great social problems of to-day, he said, was unemployment but "to claim scientific effort has resulted in over-production in a world where millions of people are for the moment suffering want is merely to acknowledge progress in producing a suitable economic structure, and that is not to be desired." Dumbfounded stupidity and greed and by extreme nationalistic policies on the part of statesmen, has not kept pace with growth of knowledge and with the world's needs."

A National Responsibility

Hon. G. M. Weir Advocates More Centralization In Educational Control

Vancouver.—Education is being recognized as a national responsibility and the British North America Act is due for amendment to meet this principle and for amendment without reference to the imperial government. Hon. Dr. G. M. Weir, British Columbia minister of education, told 1,000 delegates to the annual convention of the B.C. Teachers' Federation.

Dr. Weir declared the federal government should half pay the cost for elementary education. He also suggested there should be greater centralization in educational control and control of educational finances and predicted that within 25 years, possibly 10, the B.N.A. Act would be amended to provide for these changes.

Dr. Weir declared the federal government should half pay the cost for elementary education. He also suggested there should be greater centralization in educational control and control of educational finances and predicted that within 25 years, possibly 10, the B.N.A. Act would be amended to provide for these changes.

Alberta Planning Bar On Outside Competition

Bill Has Received Its Second Reading In House

Edmonton.—Power to prevent out-of-towners from entering the Alberta field is provided in "modified code" legislation now being considered by the provincial legislature.

This was revealed by Premier Brownlee, speaking in the house on second reading of the Bureau of Trade and Industry act, first legislation of the kind introduced in a western legislature.

The premier said the purpose of section 15 of the bill was to give power to prevent a similar business entering Alberta and competing with those in business in this province.

Demand For Wheat

Fort William.—Accumulation of export orders for wheat indicates brisk movement when the shipping season opens, according to Fort William elevator and shipping offices. A total of 15,000,000 bushels of wheat held in local elevators have been sold, according to N. M. Patterson and Co.

ELIMINATION OF LOSSES THROUGH RESEARCH WORK

Toronto.—Elimination of an annual \$20,000,000 loss to the wheat farmers of Manitoba and Saskatchewan has been effected by the research bureau of Canada through the development of strains of wheat which are immune to rust, according to Dr. H. M. Tory, head of the bureau.

Addressing the high school principals section of the Ontario Educational Association here, Dr. Tory said the research, conducted by the council, the federal department of agriculture and the three prairie universities, cost only \$250,000.

In 1916, the total loss from black stem rust, he said, was \$900,000. In 1924, research was started to overcome the tremendous loss. Within a short time, he said, new wheat strains would be distributed to the rust-infested areas.

"Recently, when I was challenged to justify the expenditures made, I stated I was prepared to demonstrate to any body of reasonable men that we had already repaid to the people of Canada, in work done, the total cost of the research council to date," he said.

Another successful research was in connection with the fishing industry of the Maritime provinces, he said. An annual loss amounting to \$500,000 resulted from deterioration of the processed product, but the loss had been completely eliminated by the council at a cost of \$5,000.

"Some years ago during a series of wet years a serious problem arose in Western Canada due to damp and tough grain being put on the market," Dr. Tory continued. "A consequent fall in price due to imperfect drying was experienced."

"We joined the producers and dealers in an attack upon the problem, solved and eliminated a loss which was estimated some years as high as \$3,000,000. A man prominent in the grain trade said to me the other day that this piece of work alone was worth more than the total cost of our research organization to date."

War On Bootleggers

Extend Powers Of Alberta Liquor Control Board

Edmonton.—With the object of giving battle to the bootlegger, the provincial government has brought down a bill in the legislature extending powers of the liquor control board.

One of the principal provisions gives the board power to extend the closing hour for venders' stores, which is now 8 p.m., the purpose of this is to check the sales by bootleggers.

The new act also changes the present provisions as to \$2 yearly and 50 cent single purchase permit. It provides for one class of permit, fees for which will be in the discretion of the lieutenant-governor-in-council. In all likelihood, the new fees will be much lower than those now required.

Tales Of The North

Miners Get Together And Recall Incidents Of Yukon Days

Quebec.—Vivid tales of the north country and the Odysseys of the Sourdoughs who blazed the trails of the Klondike and the Yukon in the days when men lived on snowshoes and women shared a plateful of beans with them in a rudely-constructed hut in Canada's northern hinterland were recalled at the 35th annual meeting of the Canadian Institute of Mining and Metallurgy.

Mining prospectors were at bat at the meeting. A number of symposiums on prospecting were delivered in which former pan-sifters spoke of their trials and tribulations in early struggles to eke out a living.

Car Prices Advance

Detroit.—Rising wages and materials costs brought automobile price increases by all automobile producing units of General Motors Corporation.

A firm of agricultural implement manufacturers, having heard that a certain machine of their manufacture had done very many years service on a certain farm, approached the owner to see if he was prepared to part with it to another farmer who required a second-hand machine. The reply they received was: "In reply to your letter re my drift, I have no wish to sell at present, it has been in use only for 37 years, and I would like to keep it until half worn out at least."

Here and There

A. C. Leighton, R.B.A., president of the Government Art College at Calgary, will again hold his summer art school for selected students from the province of Alberta at the Yana-naskis Dugie Ranch near Banff, Alta. Mr. Leighton, who is a graduate of the Royal College of Art, London, and the Royal Academy from 1878 to 1886, has been painting for years at Banff and through the Canadian Rockies. He is a graduate of the Institute of Technology and Art in connection with the University of Alberta. The Kananakis Dugie Ranch operated by Mrs. Bill Dugie, is located in the mountains, throughout Canada and the United States, and is surrounded by the most magnificent of Canadian Rocky Mountain scenery.

Governor Frank Murphy, of the Philippines Islands, was the guest of Commodore R. G. Eaton of the Canadian Pacific Line, Esq., F.R.S., of Britain, Manila on March 16. Governor Murphy inspected the liner, which is engaged on her annual tour of the World cruise, and paid a visit to the Captain and his ship many happy returns to Manila.

Captain Cyril D. Norrington, for many years Manager of the British Columbia Coast Boat Steamship service of the Canadian Pacific Railway, relinquished his duties as manager of the Canadian division of the Company's retirement regulations. He is succeeded by Captain R. W. McMurray, formerly Marine Superintendent at Vancouver.

Three cruises to the Norwegian fjords and the Land of the Midnight Sun will be made by the Empress of Australia this summer. The first cruise, of 14 days, leaves Southampton June 29, the second from London July 14, for a 14 day tour as far north as Hammeften, North Cape and Tromsberg, and the third from Birmingham, 12 days, to the fjords and Oslo and Copenhagen. Connected with these cruises from Canada or the three cruises are the Empress of Australia from Quebec June 21, the Duchess of Atholl from Montreal July 6, and the Duchess of York from Montreal July 20.

Your favorite picture stars, from Greta Garbo to Betty Boop will be with you all aboard the "Duchess" liners, as well as the "Empresses" of the Canadian Pacific this summer. The Duchess of Bedford and Duchess of York are fully equipped with talking picture machines and the Duchess of Atholl and Duchess of Richmond will be there for their first voyages this summer. The Empress of Britain and Empress of Australia have been showing talkies for some time now.

The Easter holidays, commencing March 29 and extending to April 3rd, offer an exceptional opportunity to travel. The Canadian Pacific Railway is making generous fare concessions and indications are that extensive travel programmes will be carried out by Canadians and visitors to the Dominion.

A large party of Holy Year pilgrims from the Maritime Provinces will be gathered temporarily in the Canadian Pacific liner Montcalm. On Easter Eve they will be received in audience by the Pope. They will visit London, Paris, Madrid and other cities in Europe before returning to Canada at the end of April.

Farmers' Annual Loss from Weeds Is \$179,200,000.

Special Study of Weed Control Financed by Elevator Owners.

Pamphlets to Be Had at Elevators.

Professors of Agricultural College of the University of Manitoba specialising in weed control and eradication have made compilations indicating that loss to Western Canadian farmers thru weeds amounts to over 179 million dollars annually.

In order to provide farmers with information as to the best means of controlling this-weed menace, Dr G P McRorie, professor of agronomy, and W Tildesley, assistant on weed research, approached the Northwest Grain Dealers' Assn. with a proposal that the line elevator companies finance scientific investigation concerning weed eradication. Recognising the need for such a study of the weed problem, the elevator men undertook to raise the funds for the survey. This work has now been proceeding for the past three years and results of the investigations of Professors has been turned over to the Northwest Grain Dealers.

The studies relate to Couch Grass, Saw Thistle, Canada Thistle, control of weeds by chemicals and destruction of weeds by smothering. The first of the pamphlets dealing with these subjects is now in the hands of all line country elevator agents for distribution to farmers. Any farmer may now obtain the latest scientific information on this important subject at any local line elevator.

The quality of Canada's grain crops and profitable volume of production can only be obtained thru control of weeds. Line elevator company owners are deserving of appreciation of the farming population in recognising the need for scientific study of this problem and the making available of the results of these experiments to the farmers of the West.

FIRST CHOICE OF ALL CANADA

12 months guarantee against defects and road hazards.

GOOD YEAR

Good year quality is famous. More people ride on Goodyear Tires than on any other kind. You could not have a safer guide. Come in and price your size. You'll be surprised how little they cost.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS
Nausea
Nervousness
Indigestion
Loss of Appetite
Nausea
Auto-intoxication

WHAT TO DO FOR IT:

TAKE 2-4 spoonfuls of Phillips' Milk of Magnesia in a glass of water every 2 hours until you get up. Take another teaspoonful every 30 minutes until you go to bed.

Or take 1 tablet of Phillips' Milk of Magnesia Tablets — one tablet for each of the symptoms as directed above.

I now have Acid Stomach, due to old age. I follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

When you buy — 25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

OCCASIONAL WIFE

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, are secretly deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor, and to help him get a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money from her rich parents, but is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another girl who is engaged to Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarreled. Peter starts a party at an exclusive club. Camilla goes to the party with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, she goes to the beach with Avis. They beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another girl are having a picnic. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, send a telegram to Peter asking him to work, send for her and tell her they have a new account which requires unusual treatment of juvenile art. The agency wants to know about his work, and Mr. Weeks offers him a salary of \$50.00 a week to start and a prospect of having it doubled. She tells Peter of her good account and secure employment. Camilla is also informed that Peter Hoyt is also informed that Camilla has obtained work and is going to

INFANTS' COLDS Relieved!

Young children easily catch cold. So Mrs. Bissell Ward, of Hilton Beach, Ont., wisely says: "If I notice a child with the signs of a cold, I give Baby's Own Tablets and find they are a great help." These tablets are not only good for colds but for flatulence, indigestion, constipation, toothache, earache, colic, sore stomach and so on. Baby's Own Tablets are safe and sure in relieving childhood's many ailments.

Price 25c.

leave the Hoyt household. Avis Worth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel.

(Now Go On With The Story)

CHAPTER XXXVIII.

She remained with him for another hour, striving to find the magic word or gesture that would break this spell of their disenchantment, but he remained aloof and impersonal. There was no ecstatic hour of murmured endearments and close embraces, while they discussed their work and hopes and plans. There was no deeply poignant meeting of blue and brown eyes, eloquent with wordless meanings.

She might have been any girl who had stopped in and interrupted his work, any girl whom he would have entertained with desultory words and a not too gracious manner—except for the first ten minutes which had been followed by their ugly quarrel. Their farewell was like an act in a play which they had rehearsed too many times to find exciting anymore, and Camilla walked out into the mellow autumn sunshine, seeing nothing, oblivious of sounds and feeling paralyzed. She avoided traffic by instinct and boarded the right car from habit. Nothing mattered.

Her world had turned upside down. She and Peter had said unkinds to each other, their eyes had avoided each other's in shame, instead of meeting with sympathy. Somehow they had lost that precious, happy intimacy which had made any hope possible and every denial a promise. Her eyes stared out the window at the passing landscape. Buildings, houses, trees, lamp posts, were blurred like a photograph that was badly out of focus. No object was distinguishable.

When Camilla had gone, Peter sank into a chair and dropped his head into his hands. In his gesture was all the weariness and despair of his whole past. Never had life seemed so futile and ambition such a mockery. He might have known it would be like that, but he told himself bitterly. Camilla had made practical use of her talent, and within a few weeks was offering to take care of him. He was a dreamer who couldn't even take care of himself.

He believed it was his pride that was hurt because he couldn't support the woman he loved, but it was human jealousy which pained him in Peter's mind. Only the deadly poison of jealousy could so distort both love and pride. But the most malignant factor in jealousy is that it cannot be admitted, and therefore is difficult to cure.

The more Peter brooded over his situation, the more his anger grew, and his wrath settled upon Camilla because she was the object of his jealousy and of his overwhelming desire to succeed at the same time.

A light knocking at the door startled him. Slowly, so deeply was he sunk into the absorbing quicksand of despair. He aroused himself with an effort and thought, "Camilla has come back to try to make it right. Well, she can't. I'm sick of it all."

The knocking was repeated, more imperative. He called crossly, "Come in."

The door opened and his hostile eyes met the pleasant greeting in Avis'.

"Hello, everyone," she called cheerfully, then stopped with an inquiring glance around the room. "Oh, I thought Camilla was here. I ran in to ask you both to have a little supper with me. I'm alone—and lonely." She laughed, without sincerity. " Didn't I hear her come in early this afternoon?"

"Yes, she was here," Peter replied tonelessly, and added, "but she had to leave early."

"Well, it's a good thing I came over in time to pull you out of your gloom. Another half hour and you would pass out." Her banter concealed her own suspicions of the situation and her good humor encouraged Peter. "All the more reason, then, why you should have supper with me, anyway. That's just one of the disadvantages of having a genius for a wife. Of course, she can't afford to spend all her time chirping you up."

"Oh, I'm all right," he insisted.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recommended one. Dr. Wernet's Powder, the largest seller in the world—grips teeth so securely and comfortably they feel natural. Peter Hoyt, a well-known and reliable comfort assured all day long. Forms a special comfort cushion to protect and sooth gums. No colored, gum-paste keeps mouth always bright—pleasant. Inexpensive—all drugs.

smoothing back the bright, disordered curls with a big, shapely hand. "Tired, I guess."

"Of course, you are. You've worked all day, haven't you? Come and go."

He obeyed meekly. Following Avis across the hall had got to be something of a habit. Rather a pleasant habit, too.

Avis was a clever actress. To prove that she had anticipated two guests for supper, she removed one of the plates from the table that was laid for three. She also talked easily and sparingly while she served Peter unobtrusively. Here was a "rite within the lute" of Peter's marriage, and she drove her wedge in cautiously. She restored his tranquility, made him "comfortable" and entertained him quietly. Just what he needed.

When they left the table, Avis suggested without insistence, "You surely don't need to work tonight. You should rest. Sit down and be comfy for awhile. Your place almost finished?" She turned the volume low on the radio, and a sentimental voice crooned, "You take me to Paradise." Then she lit a cigarette and held it to his lips. He took it with an amused laugh. She fired another for herself and dropped down lightly on the opposite end of the divan, arranging the pillows for her comfort.

It was strange how Avis, served and pampered and indulged, found her greatest pleasure in serving and humoring this young giant who looked as if he had been made to struggle with physical force instead of molding bits of clay. The ignominy of love—that makes servants of parasites and weaklings of slaves.

He blew smoke into space, with contentment. "Yes, I'll finish this week. I had planned to have it bronzed before sending it to the exhibit," pensively.

"Of course, you should. Why not?"

"That costs money," he replied, after a moment's hesitation, and met her glance defiantly. "So, I'll enter it as it is."

"Don't be absurd," she reproved him gently. "What's a little saving like that, if it hurts your chance to win?"

"I can't save what I don't have," grimatically.

"Well, wouldn't it pay you to borrow money on a chance like this? Besides, supposing that you don't win the prize, you can put it into marble and sell it as you suggested before."

He made a gesture of hopelessness. "Who is going to loan money to a fellow who has made a clay figure, on the chance that it will win him a prize or that he might copy it in marble and perhaps find a buyer for it? That's all the collateral I have to offer. Did you ever hear of a financier who would take such a long chance as that?"

"A better guarantee would be your talent and ambition," she suggested. He laughed ironically. "Who would

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when you feel it. It is then you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Extract. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let's help you too.

believe that I had anything so valuable?"

"I know you have." Her eyes held his gaze, significantly.

"Oh, that!" he dismissed the implication of her words, instantly. And added presently, "Funny how the women insist upon taking care of me. What's the matter with me, anyway?"

"Women?" Avis asked vaguely.

"Oh, Camilla and I just had a row about that this afternoon," he confessed bluntly. "She wanted me to let her help me with her money. Of course, she isn't making a fortune, but I guess she could spare a little. She thinks I should accept it, but what kind of a fellow wants his wife to keep him, even if he is trying to do something worthwhile? That wasn't in our agreement in the first place."

Avis exulted, but managed to keep her voice matter-of-fact and as impersonal as if she were answering Camilla herself when she said, "I think you are quite right about that, Peter. So many fellows are letting down on their pride these days, and allowing their wives to do it all. Of course you don't want to do that. I admire a man with some sand."

"Well, I have as much right to be independent as she has—and more. She wouldn't let me help her if she needed it, as things are with me now. Then why should I accept her money?"

"I think you are both right, under the circumstances. I see her point exactly—" Avis was shrewd, "—but I also see yours."

"I'm glad somebody does," he shrugged. "Well—that's that! What I think I had better do is to get a good honest job and go to work at something that turns to gold at the magic touch of toll."

"At what?"

"That's it—what. And where? Jobs being the least plentiful thing in the world just now, that complicates the problem even better."

"They don't be silly, Peter. Let me tell you something. Will you listen?"

"With both ears," he grinned.

"The beginning to have the supposition is true that genuine artists haven't a grain of business sense; you being the first and best example I know."

"Is that all you have to tell me? I know that already," disdainfully.

"Well, that's a good start. You admit the truth, then, see here! Did you ever realize that no business success is ever founded on honest and ambitious ability alone? Every artist has a financial foundation. Yet, of all the stupid people in the world, artists imagine that they are not self-made unless they starve and freeze and live absolutely independent of all the rest of the world. Is that sense?" she demanded. "Put into words, it doesn't sound practical!" Peter admitted. "What else can they do? You think I should take my wife's money, then?"

"Absolutely not. No more than a man with a lot of pride would take his wife's money to go into any business. But he would borrow money and sell stock for a foundation, and then set off to make good. Your talent and your future are just as good risks as any business, and if you were as practical as you are artistic, you would borrow money to secure your peace of mind and a comfortable living, and then give yourself to your work. You owe that to yourself and Camilla."

Peter sighed. "I had hoped to make it alone."

"You are stubborn, aren't you?" Avis smiled.

"All right, granting that you are right, and my future is worth an investment, who else could be compelled?"

"No one else needs to be," she replied casually, intent with lighting another cigarette. "I have money to invest, and right now I don't know of a safer place to put it than in the career of Peter Anson, famous American sculptor of today."

(To Be Continued)

England's Income Tax Heavy

In Canada a married person with \$5,000 income pays \$120 per year; in England with same income he pays \$703.12. The income tax is greater to the same extent on all incomes in the United Kingdom, and the British pays the highest per capita taxation in the world.

Liberal Meeting at Winterb'n

A meeting under the auspices of the S. P. Liberal Ass'n. was held at Winterburn on Friday last. The speakers were Omar St. Germain who recently crossed the floor of the house and Harry Ross, the newly elected Liberal member for Calgary. Mr G J Bryan, president of the association was in the chair.

Mr St. Germain spoke at some length upon his reasons for crossing the floor of the house. He dwelt upon the failure of the government to meet the problems which had arisen in last four years. With regard to the C. C. F. he felt that the greatest danger was the mental attitude that it created which could only result in more and more radical action. This growth was noticeable in Ontario where Mr Woodsworth was forced to disown the association because of it.

Mr Ross dwelt on the system of the liberal party. He felt that both the attitude of "what is right" or "everything must be destroyed" were equally wrong, and that we should build on the present. He pointed out many changes which were needed, but he felt they could be achieved by changes in our present system. The only hope of the future lay in a constant, steady advance.

When the speakers had finished, Mr L A Smith and Mr A Dandeneau were elected members of the Executive.

Stony Plain and District

Mr Wm Kelly, general merchant, was a business visitor to the Court on Monday.

Mr Jas Carlson, of Edmonton, was a week end visitor with Mr H B Bjork.

Mr and Mrs Jack McGillivray, Edmonton, spent the weekend with Mr J Ph Miller.

Mr John H Miller is said to have acquired the land on Main St. known as Telephone Corner, lots 1 & 2 block 10, right opposite the Stony Plain Motors.

The pallbearers at the Val Hennig funeral last week at Huallen were: E Breinkreutz, L Schoepf, W Young, Art Hosker (a son in law), C Eberhardt, F Schell-berger. Rev E G Willegrube conducted the services.

Thursday, the old market day for hogs in Stony Plain, is being revived at present, owing to the stoppage of the hog trucks from using the highway to the City. Mr P Hinkel will be at the Stockyards today (Thursday) and every Thursday until trucks are allowed to run on the highway.

BUTTER AND EGGS WANTED at The Royal Caf.

Carvel Clippings.

The funeral took place yesterday, Wednesday, of Fred Washylkiv, an old resident of Carvel district; at the age of 60 years. He had passed away on Monday afternoon. The services were conducted by the Rev. Dedyk, the pastor. He leaves to mourn his loss, his wife, and one daughter, Mrs Peter Krupka.

Inga M. D. Poundkeepers.

S.E. 16-53-2 5, A. J. Matthews, Carvel P.O.

S.E. 28-51-2 5, Donald McDonald, Brightbank P.O.
N.W. 26-52 1-5, Ph. Litzenberger, Stony Plain P.O.

Obituary.

The funeral took place on Saturday afternoon last of Mrs. E. Klapper, relict of the late Alois Klapper, who had passed away in an Edmonton hospital on Thursday, April 5th, at the age of 57 years.

Deceased was well known and highly respected in this district, where she had resided for a number of years before removing to the Westlock district some six years ago.

The Klapper couple came up from Oklahoma about 24 years ago and settled on land west of the town of Leduc; afterward removing to their farm a few miles east of Stony Plain. Her husband predeceased her in 1925.

Services were conducted by Rev. W. E. Sieber, pastor of Stony Plain United Church, and interment was made in Inga cemetery.

She is survived by 1 daughter, Mrs Herb Heinen, of Inga district, and three sons, Robert, Henry, Paul, all of Westlock district.

One Handsome Automobile.

An unadvertised demonstration here on Saturday last was the showing of the new 1934 Chevrolet at the Service Garage.

To say this new automobile outshines its predecessors is putting it mildly. To enumerate the many new features and improvements would require considerable space; this newest, handsome machine must be seen to be appreciated.

An invitation is extended to you to call and examine one of these.

The Spring Stock Show.

The annual spring show is on in Edmonton this week, and there's a big gathering of farmers, ranchers and livestock men in attendance. New classes are being featured on some of the days, while many of the popular old sections have been retained, so there is no doubt the 6 days, ending Saturday, will be highly interesting to showmen and visitors.

A sale of bulls is being held in connection.

Hansen's Corners.

The Corners is to have another industry start up in our midst—Mr G. W. Connine expects to open a general repair shop so soon as the roads permit travel on them.

Messrs W. McDonald and Karl Grosskopf were business visitors to Stony on Saturday.

Mr John Kotachorofsky is planning a trip to the North country.

Mr F Wilkin Jr. has acquired a new car.

Mr Bruce is making good progress toward recovery from his recent illness.

Mr H L Stirling is arranging to leave shortly for Jasper, to resume his duties as police officer at the Park.

Miners are busy down at the river with their Grizzlies, washing for gold.

The gold medal and blue ribbon for being the first on the land has been awarded this Spring to Mr. Don McDonald, the enterprising farmer, who claims he "got on the land on or about March 32d." Don is a kinda unofficial Agricultural agent in the district, as he had quite a time the other day coaxing a neighbor, a green farmer, from starting to sow a couple bags of bran, as "the horses liked it."

The Horse Sale.

Mr Ziegler brought in another carload of horses and had these on sale Tues. Alt. at the local livery barn. The top price for a single animal was \$73. The attendance was not up to that of the last sale. The bigger part of the consignment was in good condition and ready for work.

Spruce Grove News

The Ladies Aid of United Church are holding a silver tea combined with a sale of home cooking on Friday Alt. at the home of Mrs R N Sherwin.

Mr C. Schlang was a business visitor up to Stony on Tuesday.

Mrs L L Piercy is making a favorable recovery from a major operation she underwent in the Royal Alexandra hospital on Saturday morning last.

Miss D. Bates returned to Mannville to resume her duties as teacher, having spent the Easter holidays here, with her parents.

Mr Dan Brox has some of his fine cattle on exhibition this week at the Spring Show in Edmonton.

Mr Wm McLeod received the news on Saturday last of the death of his mother, Mrs Elizabeth McLeod, in her 75th year, at Strathecona, Prince Edward Island.

"Sport" Clendenan, who had spent the Easter holidays with friends at the Grove, returned to the City on Saturday, just in time to participate in the monster reception to the victorious hockey players who had returned from the East.

Mr McLean, the Grove's popular butcher, returned Friday afternoon from an extended trip out west.

Residents of this district turned out in large numbers on Monday Eve., at the complimentary banquet tendered Mr E Pinchbeck at the King Edward hotel, on his completing a 25 year-term as secretary to Spruce Grove Municipal District. Reeve T Wudel presided.

The political meeting tilted for Michael schoolhouse last Friday did not materialize. Messrs Bevington and Bristow were to have debated on the respective merits of the C.C.C. and the Liberal platform.
